Student Academic Performance

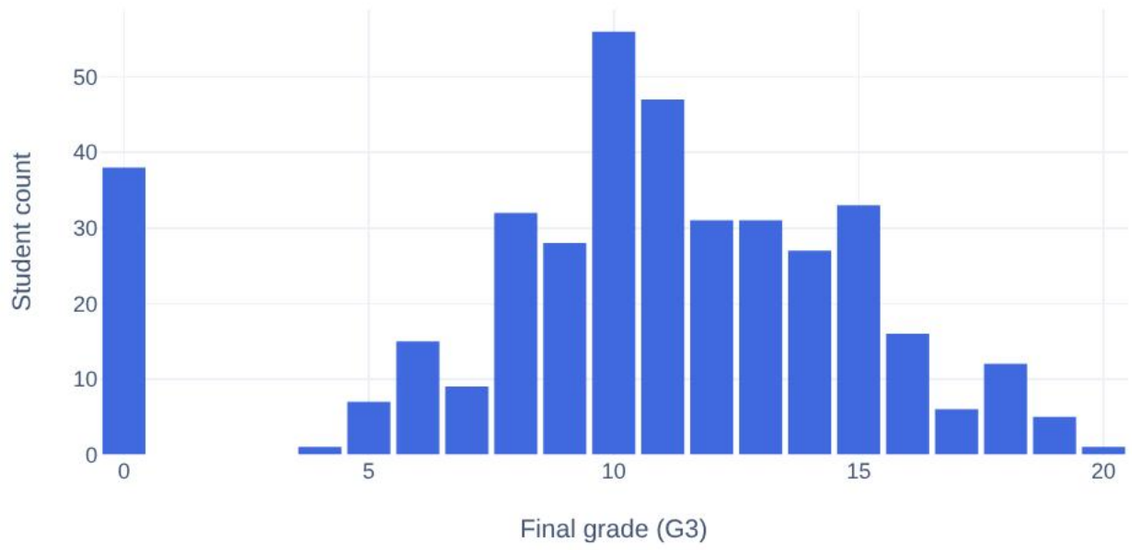

Interactive analysis dashboard · Explore grades, attendance and study-related patterns

395 records · User-provided dataset

School: All schools | Sex (recorded code): All codes | Age: All ages | Reset filters

Students selected	Average final grade (G3)	Average absences	Average G3 − G1
395	10.42	5.71	-0.49
Rows matching current filters	G3 interpreted as final grade	Mean of recorded absence counts	Descriptive grade difference

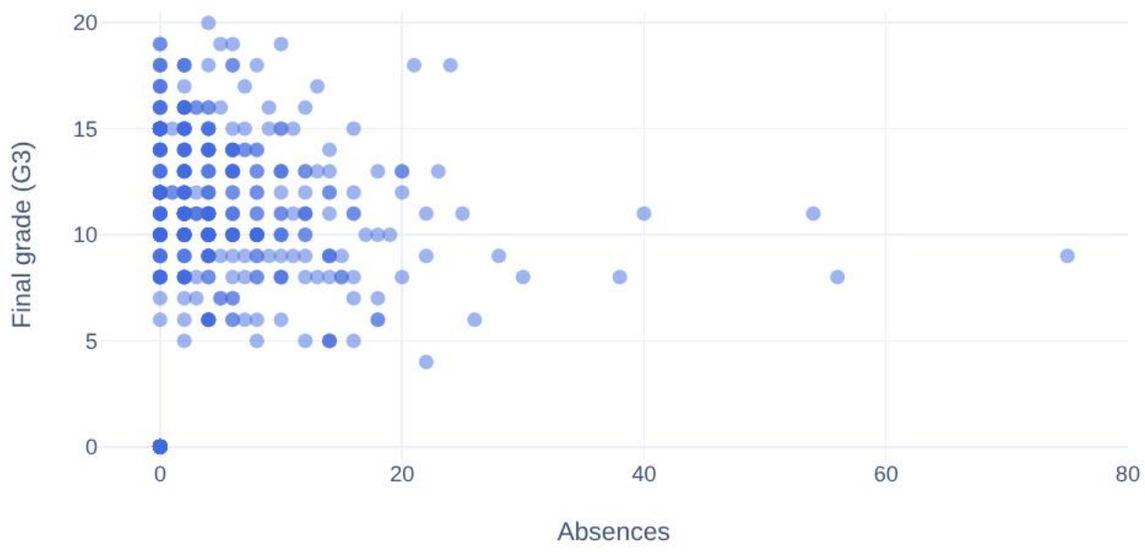

Final grade distribution

Average G3 by study-time code

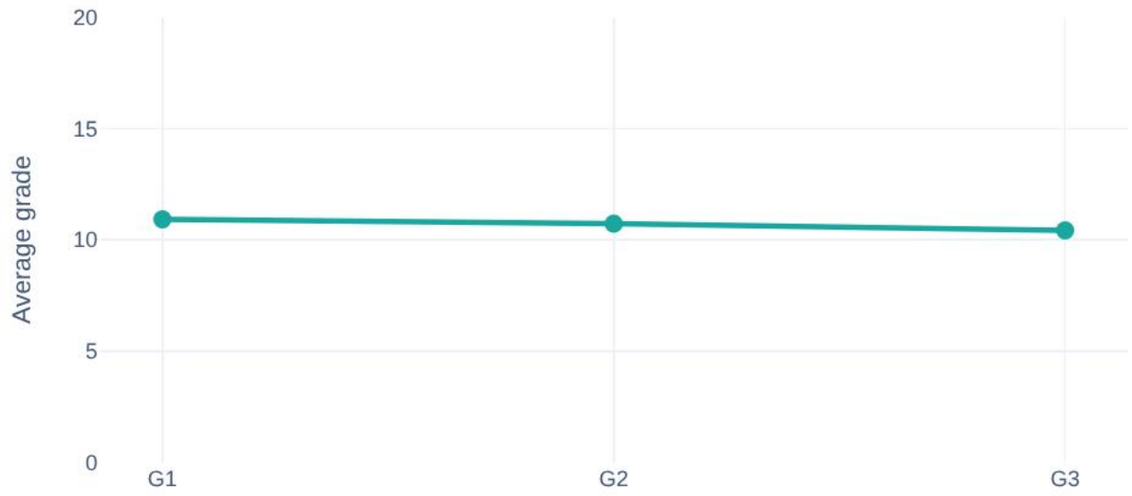

Absences and final grade

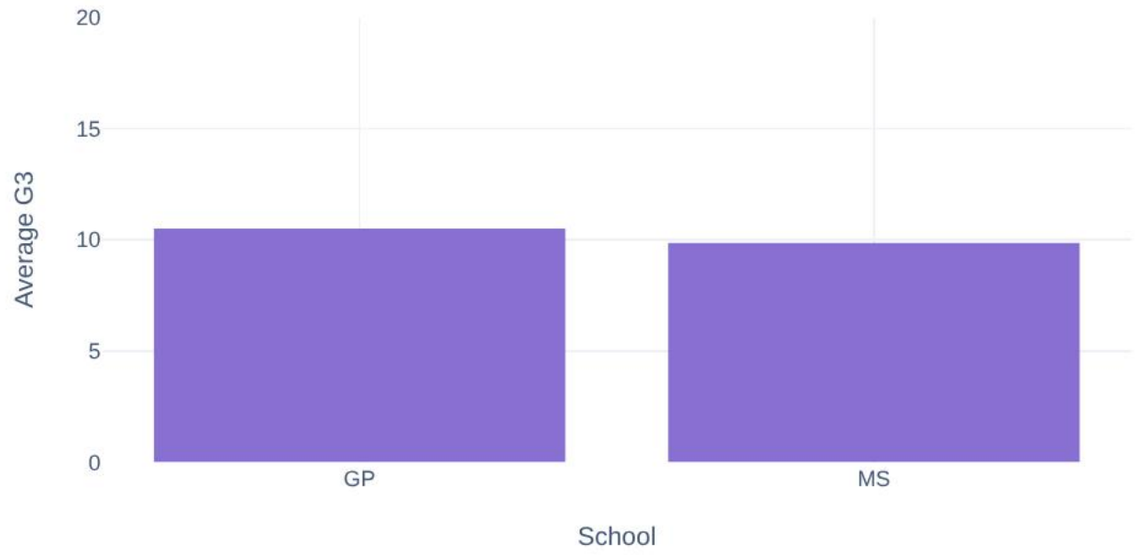

Average G3 by previous-failures code

Average grades: G1, G2 and G3

Average G3 by school

Interpretation & limitations

G3 is assumed to be the final grade, and G1/G2 earlier grades; confirm these definitions with source documentation. Original study-time, failure and sex codes are preserved. Group averages show associations, not causal effects. Filters update every chart; hover for values and group sizes. This dashboard contains descriptive analysis only—no prediction model or pass/fail threshold has been applied.
